Information

Papers are listed in Nordic Ecolabelling’s database for paper and printing companies My Swan Account (MSA). The purpose is to help printing companies applying for the Nordic Ecolabel to find and report used papers.

Name of the listed paper, grammage, producer and weighting factor will appear in MSA, and the information is therefore easily accessible to Nordic Ecolabel applicants. For details, please check the Nordic Ecolabelling’s criteria for Printing companies, printed matter, envelopes and other converted paper products, v.5.0 or later, requirement O4.

Please note that the papers need to have a valid EU Ecolabelling contract and that the current papers need to be listed in the Product Specification Annex of the EU Ecolabelling contract.

Applicant's undertaking

We hereby apply for inspection of our paper as raw materials for Nordic Ecolabelled printing companies and printed matter. The inspected paper status can be used in merchandising purposes towards Nordic Ecolabelled printing companies. We are aware that this inspection does not give us the right to use the logotype Nordic Ecolabel, nor advertise paper or pulp as Nordic Ecolabelled.

- We approve that the trade name of the listed paper, grammage, producer, and weighting factor are published in Nordic Ecolabelling's database MSA for paper and printing companies.
- We are aware that this listing in MSA does not give us the right to use the logotype of Nordic Ecolabel, nor advertise our paper as Nordic Ecolabelled.
- We agree to use Nordic Ecolabelling's electronic application aid [My Swan Account](#) for the application process. By logging in to MSA we confirm our acceptance of the User Agreement.
- We confirm that the above papers are produced only at the stated mill/place of production.
- We confirm the validity of the documentation that will be submitted in MSA.
- We agree to immediately report Nordic Ecolabelling if the validity of our EU Ecolabelling Contract expires.
- We confirm to pay the different fees per mill/production site according to the Nordic Ecolabel regulations.
